TinkerPlots Software

Software for dynamic data exploration

TinkerPlots is a data visualization and modeling tool developed for use by middle school through university students.

TinkerPlots can be used to teach grades 4 and up in subjects including math, statistics, social science, or physical or biological science. see the [TinkerPlots Overview](#) for more details.

TinkerPlots is a result of the NSF-funded [TinkerPlots project](#).

3. Choose the 1 year option, and enter 1 for “Number of computers.” Indicate that you have read and agree to the software license agreement at the bottom and click “Proceed to payment.” Tinkerplots will then email you the activation code once you’ve provided a form of payment.

Your purchase

Number of computers:
